SAFETY DATA SHEET

1. Identification

Product identifier APOQUEL

Other means of identification

Synonyms Oclacitinib Maleate Film Coated Tablets

Recommended use of the chemical and restrictions on use

Recommended use Veterinary product

Restrictions on use Not for human use

Details of manufacturer or importer

Company Name (AU) Zoetis Australia Pty Ltd

Address ABN 94 156 476 425

Level 6, 5 Rider Boulevard

Rhodes NSW 2138 AUSTRALIA

Tel 1800 814 883

Fax (02) 8876 0444

Email productsupport.au@zoetis.com

Emergency Phone 1800 814 883 (all hours)

Police and Fire Brigade Dial 000

If ineffective Dial Poisons Information Centre (13 1126 from anywhere in Australia)

2. Hazard(s) identification

Classification of the hazardous chemical

Physical hazards Not classified.

Health hazards Serious eye damage/eye irritation

Category 1

Environmental hazards Hazardous to the aquatic environment, acute hazard

Category 3

Label elements, including precautionary statements

Hazard symbol(s)

Corrosion

Signal word Danger

Hazard statement(s) Causes serious eye damage. Harmful to aquatic life.

Precautionary statement(s)

Prevention Avoid release to the environment. Wear eye protection/face protection.

Response IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTRE or doctor/physician.

Storage Store away from incompatible materials.

Disposal Dispose of contents/container in accordance with local/regional/national/international regulations.

Other hazards which do not result in classification None known.

Supplemental information May form combustible dust concentrations in air. May cause slight skin irritation.

3. Composition/information on ingredients

Mixture
## Concentration of ingredients (%)

<table>
<thead>
<tr>
<th>Identity of chemical ingredients</th>
<th>CAS number and other unique identifiers</th>
<th>Concentration of ingredients (%)</th>

</tr>
</tbody>
</table>

**Composition comments**: *Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

### 4. First-aid measures

#### Description of necessary first aid measures

- **Inhalation**: Move to fresh air. Call a physician if symptoms develop or persist.
- **Skin contact**: Wash off with soap and water. Get medical attention if irritation develops and persists.
- **Eye contact**: Immediately flush with plenty of water for at least 15 minutes. If easy to do, remove contact lenses. Continue rinsing. Get medical attention immediately.
- **Ingestion**: Call a physician or poison control centre immediately. Only induce vomiting at the instruction of medical personnel. Never give anything by mouth to an unconscious person. Rinse mouth.

**Personal protection for first-aid responders**: Dusts may irritate the respiratory tract, skin and eyes. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Difficulty in breathing. Prolonged exposure may cause chronic effects.

**Symptoms caused by exposure**: Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

**Medical attention and special treatment**:

### 5. Fire-fighting measures

- **Extinguishing media**: Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).
- **Unsuitable extinguishing media**: Do not use water jet as an extinguisher, as this will spread the fire.
- **Specific hazards arising from the chemical**: During fire, gases hazardous to health may be formed.
- **Special protective equipment and precautions for firefighters**: Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
- **Fire fighting equipment/instructions**: Use water spray to cool unopened containers.
- **Hazchem code**: None.
- **General fire hazards**: May form combustible dust concentrations in air.
- **Specific methods**: Use standard firefighting procedures and consider the hazards of other involved materials.

### 6. Accidental release measures

- **Personal precautions, protective equipment and emergency procedures**
  - For non-emergency personnel: Keep unnecessary personnel away.
  - For emergency responders: Ensure adequate ventilation. Ventilate the contaminated area. Do not breathe dust. Avoid contact with eyes, skin, and clothing. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Use personal protection recommended in Section 8 of the SDS.

- **Environmental precautions**: Avoid discharge into drains, water courses or onto the ground.
Methods and materials for containment and cleaning up

Eliminate all ignition sources (no smoking, flares, sparks or flames in immediate area). Ensure adequate ventilation. Avoid dust formation. Avoid release to the environment. Prevent entry into waterways, sewer, basements or confined areas.

Large spills: Stop the flow of material, if this is without risk. Cover with plastic sheet to prevent spreading. Absorb in vermiculite, dry sand or earth and place into containers. Clean surface thoroughly to remove residual contamination.

Small spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.

7. Handling and storage

Precautions for safe handling

Provide adequate ventilation. Do not get this material in contact with eyes. Avoid contact with skin. Avoid prolonged exposure. Minimise dust generation and accumulation. Do not breathe dust. When using, do not eat, drink or smoke. Wash thoroughly after handling. Wear personal protective equipment. Observe good industrial hygiene practices. Avoid release to the environment.

Conditions for safe storage, including any incompatibilities

Keep tightly closed in a dry, cool and well-ventilated place. @ 20 - 25C / 68 - 77F. Keep away from heat, sparks and open flame. Keep out of the reach of children.

8. Exposure controls and personal protection

Control parameters

Follow standard monitoring procedures.

Biological limit values

No biological exposure limits noted for the ingredient(s).

Exposure guidelines

OEL Additional Information: Severe Eye Irritant
Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. If material is ground, cut, or used in any operation which may generate dusts, use appropriate local exhaust ventilation to keep exposures below the recommended exposure limits. General ventilation normally adequate. Provide eyewash station.

Individual protection measures, for example personal protective equipment (PPE)

Eye/face protection
If contact is likely, safety glasses with side shields are recommended.
Industrial use: Wear safety glasses with side shields (or goggles) and a face shield.

Skin protection
Hand protection
Wear appropriate chemical resistant gloves. Suitable gloves can be recommended by the glove supplier.

Other
Wear suitable protective clothing. Use protective clothing (uniforms, lab coats, disposable coveralls, etc.) in both production and laboratory areas.

Respiratory protection
No personal respiratory protective equipment normally required. Respirator must be worn if exposed to dust. If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn. Chemical respirator with organic vapour cartridge, full facepiece, dust and mist filter.

Thermal hazards
Wear appropriate thermal protective clothing, when necessary.

Hygiene measures
Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

Material name: APOQUEL
Decomposition temperature: Not available.
Viscosity: Not available.

Other physical and chemical parameters:
- Explosive properties: Not explosive.
- Molecular formula: Mixture
- Molecular weight: Mixture
- Oxidising properties: Not oxidising.

10. Stability and reactivity

Reactivity: The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability: Material is stable under normal conditions.
Possibility of hazardous reactions: No dangerous reaction known under conditions of normal use.
Conditions to avoid: Contact with incompatible materials. Keep away from heat, spark, open flames and other sources of ignition.
Incompatible materials: Strong oxidising agents. Fluorine.
Hazardous decomposition products: No hazardous decomposition products are known.

11. Toxicological information

Information on possible routes of exposure:

Inhalation: Dust may irritate respiratory system.
Skin contact:
- Oclacitinib maleate: Prolonged skin contact may cause temporary irritation. Species: Rabbit Severity: Minimal
- Microcrystalline cellulose: Species: Rabbit Severity: Non-irritating

Eye contact:
- Microcrystalline cellulose: Causes serious eye damage. Species: Rabbit Severity: Non-irritating
- Oclacitinib maleate: Species: Rabbit Severity: Severe

Ingestion: May cause discomfort if swallowed.

Symptoms related to exposure: Dusts may irritate the respiratory tract, skin and eyes. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Difficulty in breathing. Prolonged exposure may cause chronic effects.

Acute toxicity: Not acutely toxic

**Skin corrosion/irritation**: Prolonged skin contact may cause temporary irritation.

**Irritation Corrosion - Skin**
- Oclacitinib maleate: Result: Minimal, Species: Rabbit

**Serious eye damage/irritation**: Causes serious eye damage.

**Eye contact**
- Microcrystalline cellulose: Species: Rabbit, Severity: Non-irritating
- Oclacitinib maleate: Species: Rabbit, Severity: Severe

**Respiratory or skin sensitisation**

**Respiratory sensitisation**: Not a respiratory sensitizer.

**Skin sensitisation**: This product is not expected to cause skin sensitisation.

**Skin Sensitisation**
- Oclacitinib maleate: LLNA, Species: Mouse, Severity: Negative

**Germ cell mutagenicity**: No data available to indicate product or any components present at greater than 0.1% are mutagenic or genotoxic.

**Mutagenicity**
- Oclacitinib maleate: Bacterial Mutagenicity (Ames) Result: Negative, Species: Salmonella, E. coli
- In Vitro Chromosome Aberration Result: Negative with activation, without activation, Species: Human lymphocytes
- In Vitro Micronucleus Result: Positive with activation, without activation
Mutagenicity
Oclacitinib maleate
In Vitro Micronucleus
Result: Positive without activation, aneugenic
Species: Chinese Hamster Ovary (CHO) cells

In Vivo Micronucleus
Result: Negative
Species: Rat Bone Marrow

Carcinogenicity
Due to partial or complete lack of data the classification is not possible.

ACGIH Carcinogens
Magnesium stearate (CAS 557-04-0) A4 Not classifiable as a human carcinogen.

Reproductive toxicity
This product is not expected to cause reproductive or developmental effects.

Specific target organ toxicity - single exposure
Not classified.

Specific target organ toxicity - repeated exposure
Not classified.

Aspiration hazard
Not an aspiration hazard.

Chronic effects
May cause damage to organs through prolonged or repeated exposure.

12. Ecological information
Ecotoxicity
Harmful to aquatic life. Avoid release to the environment.

Persistence and degradability
No data is available on the degradability of this product.

Bioaccumulative potential
See below

Partition coefficient
n-octanol / water (log Kow)
Oclacitinib maleate 1.18, Predicted Log D @ pH 7.4

Mobility in soil
No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations
Disposal methods
Avoid release to the environment. Considering the relevant known environmental and human health hazards of the material, review and implement appropriate technical and procedural waste water and waste disposal measures to prevent occupational exposure and environmental release. It is recommended that waste minimization be practiced. The best available technology should be utilized to prevent environmental releases. This may include destructive techniques for waste and wastewater. Dispose of contents/container in accordance with local/regional/national/international regulations.

Residual waste
Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner.

Contaminated packaging
Since emptied containers may retain product residue, follow label warnings even after container is emptied.

14. Transport information
ADG
Not regulated as dangerous goods.

RID
Not regulated as dangerous goods.
IATA
Not regulated as dangerous goods.

IMDG
Not regulated as dangerous goods.

Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code
Not applicable.

15. Regulatory information

Safety, health and environmental regulations

National regulations
This Safety Data Sheet was prepared in accordance with Australia Model Code of Practice for the preparation of Safety Data Sheets for Hazardous Chemicals (23/12/2011).
