# SAFETY DATA SHEET

## 1. Identification

**Product identifier**

Cerenia Tablets

**Other means of identification**

- CERENIA * Cerenia® Tablets * Cerenia (maropitant citrate) Tablets * Cerenia® Tablets for Dogs * Maropitant Citrate Tablets

**Synonyms**

Recommended use of the chemical and restrictions on use

- **Recommended use** Veterinary product used as Anti-emetic
- **Restrictions on use** Not for human use

**Details of manufacturer or importer**

- **Company Name (AU)** Zoetis Australia Pty Ltd
  
  ABN 94 156 476 425
  
  Level 6, 5 Rider Boulevard
  
  Rhodes NSW 2138 AUSTRALIA

- **Tel** 1800 814 883
- **Fax** (02) 8876 0444
- **Email** australia.animalhealth@zoetis.com
- **Emergency Phone** 1800 814 883 (all hours)
- **Police and Fire Brigade** Dial 000
- **If ineffective** Dial Poisons Information Centre (13 1126 from anywhere in Australia)

## 2. Hazard(s) identification

**Classification of the hazardous chemical**

<table>
<thead>
<tr>
<th>Physical hazards</th>
<th>Health hazards</th>
<th>Environmental hazards</th>
</tr>
</thead>
<tbody>
<tr>
<td>Not classified.</td>
<td>Serious eye damage/eye irritation Category 1</td>
<td>Hazardous to the aquatic environment, acute hazard Category 2</td>
</tr>
<tr>
<td></td>
<td>Specific target organ toxicity following repeated exposure</td>
<td>Hazardous to the aquatic environment, long-term hazard Category 2</td>
</tr>
</tbody>
</table>

**Label elements, including precautionary statements**

- **Signal word** Danger
- **Hazard statement(s)** Causes serious eye damage. May cause damage to organs (cardiovascular system, liver) through prolonged or repeated exposure. Toxic to aquatic life with long lasting effects.
- **Precautionary statement(s)**
  
  **Prevention**

  Do not breathe dust/fume/gas/mist/vapors/spray. Avoid release to the environment. Wear eye protection/face protection.

  **Response**

  Get medical advice/attention if you feel unwell. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTRE or doctor/physician. Collect spillage.

  **Storage**

  Store away from incompatible materials.

  **Disposal**

  Dispose of contents/container in accordance with local/regional/national/international regulations.
Other hazards which do not result in classification: None known.

Supplemental information: Drugs of this class have been associated with rare, but potentially serious cardiac events. These effects have not been observed from occupational exposures, however, those with preexisting cardiovascular illnesses may be at increased risk from exposure.

3. Composition/information on ingredients

<table>

</tbody>
</table>

4. First-aid measures

Description of necessary first aid measures

**Inhalation**: Move to fresh air. Call a physician if symptoms develop or persist. For breathing difficulties, oxygen may be necessary.

**Skin contact**: Wash off with soap and plenty of water. If skin irritation occurs: Get medical advice/attention. Take off contaminated clothing and wash before reuse.

**Eye contact**: Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention immediately.

**Ingestion**: Rinse mouth. Call a physician or poison control centre immediately. Do not induce vomiting without advice from poison control center. Never give anything by mouth to a victim who is unconscious or is having convulsions.

Personal protection for first-aid responders: For personal protection, see section 8 of the SDS. IF exposed or concerned: Get medical advice/attention. Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

Symptoms caused by exposure: Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Prolonged exposure may cause chronic effects. Individuals with cardiac conditions may be more susceptible to toxicity in cases of overexposure.

Medical attention and special treatment: Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

5. Fire-fighting measures

Extinguishing media

**Suitable extinguishing media**: Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

**Unsuitable extinguishing media**: Do not use water jet as an extinguisher, as this will spread the fire.

Specific hazards arising from the chemical: During fire, gases hazardous to health may be formed.

Special protective equipment and precautions for firefighters: Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Fire fighting equipment/instructions: Use water spray to cool unopened containers.

Hazchem Code: None.

General fire hazards: No unusual fire or explosion hazards noted.

Specific methods: Use standard firefighting procedures and consider the hazards of other involved materials.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

**For non-emergency personnel**: Keep unnecessary personnel away. Local authorities should be advised if significant spillages cannot be contained.
For emergency responders

Ensure adequate ventilation. Wear appropriate protective equipment and clothing during clean-up. Keep unnecessary personnel away. Avoid dust formation. Ventilate the contaminated area. ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area). Do not breathe dust. Avoid contact with eyes, skin, and clothing. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. For personal protection, see section 8 of the SDS.

Environmental precautions

Avoid release to the environment. Inform appropriate managerial or supervisory personnel of all environmental releases. Prevent further leakage or spillage if safe to do so. Avoid discharge into drains, water courses or onto the ground.

Methods and materials for containment and cleaning up

Ensure adequate ventilation. Avoid dust formation. Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Prevent product from entering drains.

Large Spills: Stop the flow of material, if this is without risk. Ground/bond container and equipment. Sweep up or vacuum up spillage and collect in suitable container for disposal. Clean contaminated surface thoroughly. Prevent release to the environment.

Small Spills: Wipe up with a damp cloth and place in container for disposal. Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.

7. Handling and storage

Precautions for safe handling

Use with adequate ventilation. Do not handle, store or open near an open flame, sources of heat or sources of ignition. Protect material from direct sunlight. Avoid contact with eyes, skin, and clothing. If tablets or capsules are crushed and/or broken, avoid breathing dust and avoid contact with eyes. Avoid prolonged exposure. Wash hands thoroughly after handling. When using, do not eat, drink or smoke. Wear appropriate personal protective equipment. Observe good industrial hygiene practices. Avoid release to the environment.

Conditions for safe storage, including any incompatibilities

Store in original tightly closed container. Store in a well-ventilated place. @ 15-30°C (59-86°F). Keep away from heat, sparks and open flame. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure controls and personal protection

Control parameters

Follow standard monitoring procedures.

Occupational exposure limits

Zoetis Components | Type | Value
--- | --- | ---
Maropitant Citrate Salt, Monohydrate (CAS 359875-09-5) | TWA | 20 µg/m³

Australia. National Workplace OELs (Workplace Exposure Standards for Airborne Contaminants, Appendix A) Components | Type | Value | Form
--- | --- | --- | ---
Magnesium stearate (CAS 557-04-0) | TWA | 10 mg/m³ | Inhalable dust.
Microcrystalline cellulose (CAS 9004-34-6) | TWA | 10 mg/m³ | Inhalable fibers.

Australia. OELs. (Adopted National Exposure Standards for Atmospheric Contaminants in the Occupational Environment) Components | Type | Value | Form
--- | --- | --- | ---
Magnesium stearate (CAS 557-04-0) | TWA | 10 mg/m³ | Inspirable dust.
Microcrystalline cellulose (CAS 9004-34-6) | TWA | 10 mg/m³ | Inspirable dust.

US. ACGIH Threshold Limit Values Components | Type | Value
--- | --- | ---
Magnesium stearate (CAS 557-04-0) | TWA | 10 mg/m³
Microcrystalline cellulose (CAS 9004-34-6) | TWA | 10 mg/m³
UK. EH40 Workplace Exposure Limits (WELs)

### Biological limit values
No biological exposure limits noted for the ingredient(s).

### Appropriate engineering controls
Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. General ventilation normally adequate. Provide eyewash station.

### Individual protection measures, for example personal protective equipment (PPE)

#### Eye/face protection
Wear safety glasses or goggles if eye contact is possible. Chemical goggles are recommended.

#### Skin protection
Wear protective gloves. Impervious gloves are recommended if skin contact with drug product is possible and for bulk processing operations.

#### Hand protection
Wear suitable protective clothing. Use protective clothing (uniforms, lab coats, disposable coveralls, etc.) in both production and laboratory areas.

#### Respiratory protection
No personal respiratory protective equipment normally required. In case of insufficient ventilation, wear suitable respiratory equipment. Respiratory protection should be provided in instances where exposure to dust, mists, aerosols or vapors are likely. If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn.

#### Thermal hazards
Not applicable.

### Hygiene measures
Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

### 9. Physical and chemical properties

#### Appearance
- tablet

#### Physical state
- Solid.

#### Form
- Solid.

#### Colour
- Peach

#### Odour
- Not available.

#### Odour threshold
- Not available.

#### pH
- Not available.

#### Melting point/freezing point
- Not available.

#### Initial boiling point and boiling range
- Not available.

#### Flash point
- Not available.

#### Evaporation rate
- Not available.

#### Flammability (solid, gas)
- Not available.

#### Upper/lower flammability or explosive limits
- Not available.
Solubility(ies)
  Solubility (water)  Not available.
Partition coefficient
  (n-octanol/water)  Not available.
Auto-ignition temperature  Not available.
Decomposition temperature  Not available.
Viscosity  Not available.
Other physical and chemical parameters
  Explosive properties  Not explosive.
  Oxidising properties  Not oxidising.

10. Stability and reactivity
Reactivity  The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability  Material is stable under normal conditions.
Possibility of hazardous reactions  No dangerous reaction known under conditions of normal use.
Conditions to avoid  Contact with incompatible materials. Heat, flames and sparks. High temperatures. Sunlight.
Incompatible materials  Strong oxidising agents. Fluorine.
Hazardous decomposition products  Irritating and/or toxic fumes and gases may be emitted upon the product's decomposition.

11. Toxicological information

Information on possible routes of exposure
  Inhalation  Prolonged inhalation may be harmful.
  Skin contact  Prolonged skin contact may cause temporary irritation.
Maropitant Citrate Salt, Monohydrate  Species: Rabbit  Severity: Non-irritating
Microcrystalline cellulose  Species: Rabbit  Severity: Non-irritating
  Eye contact  Causes serious eye damage.
Maropitant Citrate Salt, Monohydrate  Species: Rabbit  Severity: Severe
Microcrystalline cellulose  Species: Rabbit  Severity: Non-irritating
  Ingestion  Expected to be a low ingestion hazard.
Symptoms related to exposure  Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Prolonged exposure may cause chronic effects.
Acute toxicity  Expected to be a low hazard for usual industrial or commercial handling by trained personnel.
Components  Species  Test results

Aspiration hazard
Not an aspiration hazard.

Chronic effects
Prolonged inhalation may be harmful.

Other information
Drugs of this class have been associated with rare, but potentially serious cardiac events. These effects have not been observed from occupational exposures, however, those with preexisting cardiovascular illnesses may be at increased risk from exposure.

12. Ecological information

Ecotoxicity
Toxic to aquatic life with long lasting effects. Avoid release to the environment.

Persistence and degradability
No data is available on the degradability of this product. In the environment, the active ingredient in this formulation is expected to degrade slowly.

Bioaccumulative potential
No data available.

Mobility in soil
No data available for this product.

Other adverse effects
No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal methods
Avoid release to the environment. Do not allow this material to drain into sewers/water supplies. Do not contaminate ponds, waterways or ditches with chemical or used container. Considering the relevant known environmental and human health hazards of the material, review and implement appropriate technical and procedural waste water and waste disposal measures to prevent occupational exposure and environmental release. It is recommended that waste minimization be practiced. The best available technology should be utilized to prevent environmental releases. This may include destructive techniques for waste and wastewater. Dispose of contents/container in accordance with local/regional/national/international regulations.

Residual waste
Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging
Since emptied containers may retain product residue, follow label warnings even after container is emptied.

14. Transport information

ADG
Not regulated as dangerous goods.

Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code

IATA; IMDG; RID

IMDG Regulated Marine Pollutant. As of January 1, 2015, materials offered for transport that are classified for transportation only as Marine Pollutants and which are packaged in single or combination packagings containing a net quantity per single or inner packaging of 5 Liters or less for liquids or having a net mass per single or inner packaging of 5 kilograms or less for solids are NOT subject to ICAO/IATA, IMDG, or ADR transport regulations provided the general packaging requirements of those regulations are met. Refer to ICAO/IATA A197, IMDG 2.10.2.7, ADR SP 375. Please refer to the applicable dangerous goods regulations for additional information. Transport according to the requirements of the appropriate regulatory body.

15. Regulatory information

Safety, health and environmental regulations

This Safety Data Sheet was prepared in accordance with Australia Model Code of Practice for the preparation of Safety Data Sheets for Hazardous Chemicals (23/12/2011).

Poison Schedule (Product) - Schedule 4
