SAFETY DATA SHEET

1. Identification

Product identifier: VetScan HemaClean Kit
Other means of identification: None.

Recommended use of the chemical and restrictions on use

- **Recommended use**: Veterinary product
- **Restrictions on use**: Not for human use

Details of manufacturer or importer

- **Company Name (AU)**: Zoetis Australia Pty Ltd
- **ABN**: 94 156 476 425
- **Level 6, 5 Rider Boulevard**: Rhodes NSW 2138 AUSTRALIA
- **Tel**: 1800 814 883
- **Fax**: (02) 8876 0444
- **Email**: productsupport.au@zoetis.com
- **Emergency Phone**: 1800 814 883 (all hours)
- **Police and Fire Brigade**: Dial 000
- **If ineffective**: Dial Poisons Information Centre (13 1126 from anywhere in Australia)

2. Hazard(s) identification

Classification of the hazardous chemical

- **Physical hazards**: Corrosive to metals Category 1
- **Health hazards**: Skin corrosion/irritation Category 1B
- **Serious eye damage/eye irritation**: Category 1
- **Environmental hazards**: Hazardous to the aquatic environment, acute hazard Category 1
- **Hazardous to the aquatic environment, long-term hazard**: Category 2

Label elements, including precautionary statements

- **Hazard symbol(s)**: Corrosion Environment
- **Signal word**: Danger
- **Hazard statement(s)**: May be corrosive to metals. Causes severe skin burns and eye damage. Very toxic to aquatic life. Toxic to aquatic life with long lasting effects.
- **Precautionary statement(s)**:
  - **Prevention**: Do not breathe mist or vapour. Wash thoroughly after handling. Avoid release to the environment. Wear protective gloves/protective clothing/eye protection/face protection.
  - **Response**: IF SWALLOWED: rinse mouth. Do NOT induce vomiting. IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower. IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTRE or doctor/physician. Wash contaminated clothing before reuse. Collect spillage. Absorb spillage to prevent material damage.
  - **Storage**: Store locked up. Store in a corrosive resistant container with a resistant inner liner.
  - **Disposal**: Dispose of contents/container in accordance with local/regional/national/international regulations.
Other hazards which do not result in classification
None known.

Supplemental information
Contact with acids liberates toxic gas.

3. Composition/information on ingredients

Composition comments
Other components below reportable levels.

4. First-aid measures

Description of necessary first aid measures

Inhalation
Move to fresh air. Call a physician if symptoms develop or persist. Call a poison centre or doctor/physician if you feel unwell. For breathing difficulties, oxygen may be necessary.

Skin contact
Remove contaminated clothing. Immediately flush skin with plenty of water. Continue rinsing. Get medical attention/advice if you feel unwell. Wash contaminated clothing before reuse.

Eye contact
Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention immediately.

Ingestion
If swallowed, do NOT induce vomiting. Rinse mouth. Call a physician or poison control centre immediately. Only induce vomiting at the instruction of medical personnel. Never give anything by mouth to an unconscious person.

Personal protection for first-aid responders
IF exposed or concerned: Get medical advice/attention. You should call The Poisons Information Centre if you feel that you may have been poisoned, burned or irritated by this product. The number is 13 1126 from anywhere in Australia (0800 764 766 in New Zealand) and is available at all times. Have this SDS with you when you call. For personal protection, see section 8 of the SDS. Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Show this safety data sheet to the doctor in attendance. Chemical burns must be treated by a physician.

Symptoms caused by exposure
May cause severe irritation or burns to the eyes, skin, gastrointestinal tract, and respiratory system. Burning pain and severe corrosive skin damage. Causes serious eye damage. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. May cause respiratory irritation. Coughing.

Medical attention and special treatment
Provide general supportive measures and treat symptomatically. Oxygen or artificial respiration if needed. Chemical burns: Flush with water immediately. While flushing, remove clothes which do not adhere to affected area. Call an ambulance. Continue flushing during transport to hospital.

5. Fire-fighting measures

Extinguishing media
- Suitable extinguishing media
  - Foam. Powder. Carbon dioxide (CO2).
- Unsuitable extinguishing media
  - Do not use water jet as an extinguisher, as this will spread the fire. Dry chemicals. (Ammonium compounds.)

Specific hazards arising from the chemical
- Fire may produce irritating, corrosive and/or toxic gases. Some may decompose explosively when heated or involved in a fire.

Special protective equipment and precautions for firefighters
- Self-contained breathing apparatus and full protective clothing must be worn in case of fire. Structural firefighters protective clothing will only provide limited protection.
- Move containers from fire area if you can do so without risk. Use water spray to cool unopened containers.

Hazchem code
2X

General fire hazards
- Fire may produce irritating, corrosive and/or toxic gases.

Specific methods
- Use standard firefighting procedures and consider the hazards of other involved materials.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures
For non-emergency personnel
- Keep unnecessary personnel away. Local authorities should be advised if significant spillages cannot be contained.
For emergency responders
Keep unnecessary personnel away. Ensure adequate ventilation. Wear appropriate protective equipment and clothing during clean-up. Do not breathe mist or vapour. Do not get in eyes, on skin, or on clothing. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing.

Environmental precautions
Avoid discharge into drains, water courses or onto the ground.

Methods and materials for containment and cleaning up
Remove sources of ignition. Ventilate the contaminated area. Minimize generating airborne mists and vapors. Wear appropriate protective equipment and clothing during clean-up. Avoid release to the environment.

Large Spills: Stop the flow of material, if this is without risk. Absorb in vermiculite, dry sand or earth and place into containers. Clean surface thoroughly to remove residual contamination. Neutralize the spilled material before disposal.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.

7. Handling and storage

Precautions for safe handling
Use only with adequate ventilation. Wear personal protective equipment. Do not get in eyes, on skin, or on clothing. Do not breath mist or vapour. Minimize generating airborne mists and vapors. Observe good industrial hygiene practices. Handle and open container with care. When using, do not eat, drink or smoke. Wash thoroughly after handling. Wash contaminated clothing before reuse. Avoid release to the environment.

Conditions for safe storage, including any incompatibilities
Store locked up. Store in tightly closed original container in a dry, cool and well-ventilated place. Do not store in direct sunlight. Use appropriate container to avoid environmental contamination. Store away from incompatible materials (see Section 10 of the SDS). Keep away from heat, sparks and open flame. Store in corrosive resistant container with a resistant inner liner.

8. Exposure controls and personal protection

Control parameters
Follow standard monitoring procedures.

Occupational exposure limits
No exposure limits noted for ingredient(s).

Biological limit values
No biological exposure limits noted for the ingredient(s).

Exposure guidelines
No exposure standards allocated.

Appropriate engineering controls
Ensure adequate ventilation, especially in confined areas. General ventilation normally adequate. Eye wash facilities and emergency shower must be available when handling this product.

Individual protection measures, for example personal protective equipment (PPE)

Eye/face protection
Wear safety glasses with side shields (or goggles).

Skin protection
Hand protection
Wear appropriate chemical resistant gloves.

Other
Wear suitable protective clothing. Use protective clothing (uniforms, lab coats, disposable coveralls, etc.) in both production and laboratory areas.

Respiratory protection
No personal respiratory protective equipment normally required. Whenever excessive air contamination (dust, mist, vapor) is generated, respiratory protection, with appropriate protection factors, should be used to minimize exposure.

Thermal hazards
Not applicable.

Hygiene measures
Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

9. Physical and chemical properties

Appearance
Physical state
Liquid.

Form
Liquid.

Colour

Odour
Strong. Chlorine.

Odour threshold
Not available.

pH
11 - 13

Melting point/freezing point
-15 °C (5 °F) (12% solution)
Initial boiling point and boiling range  Not available.
Flash point  Not available.
Evaporation rate  Not available.
Flammability (solid, gas)  Not applicable.
Upper/lower flammability or explosive limits
  Flammability limit - lower (%)  Not available.
  Flammability limit - upper (%)  Not available.
  Explosive limit - lower (%)  Not available.
  Explosive limit – upper (%)  Not available.
Vapour pressure  Not available.
Vapour density  Not available.
Relative density  Not available.
Solubility(ies)
  Solubility (water)  Soluble
Partition coefficient (n-octanol/water)  Not available.
Auto-ignition temperature  Not available.
Decomposition temperature  > 40 °C (> 104 °F)
Viscosity  Not available.
Other physical and chemical parameters
  Explosive properties  Not explosive.
  Oxidising properties  Not oxidising.
  Specific gravity  1.1 - 1.2

10. Stability and reactivity
Reactivity  The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability  Material is stable under normal conditions.
Possibility of hazardous reactions  No dangerous reaction known under conditions of normal use.
Hazardous decomposition products  Irritating and/or toxic fumes and gases may be emitted upon the product's decomposition. Chlorine. Hydrogen chloride. Chlorine compounds.

11. Toxicological information
Information on possible routes of exposure
  Inhalation  Health injuries are not known or expected under normal use.
  Skin contact  Causes severe skin burns.
  Eye contact  Causes serious eye damage.
  Ingestion  May be harmful if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.
Symptoms related to exposure  May cause severe irritation or burns to the eyes, skin, gastrointestinal tract, and respiratory system. Burning pain and severe corrosive skin damage. Causes serious eye damage. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. May cause respiratory irritation. Coughing.
### Acute toxicity
Expected to be a low hazard for usual industrial or commercial handling by trained personnel.

### Persistence and degradability
No data available for this product.

### Bioaccumulative potential
No data available for this product.

### Mobility in soil
No data available for this product.

### Other adverse effects
No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

### Disposal considerations
Avoid release to the environment. Do not discharge into drains, water courses or onto the ground. Do not dispose of waste into sewer. Considering the relevant known environmental and human health hazards of the material, review and implement appropriate technical and procedural waste water and waste disposal measures to prevent occupational exposure and environmental release. It is recommended that waste minimization be practiced. The best available technology should be utilized to prevent environmental releases. This may include destructive techniques for waste and wastewater. Dispose of contents/container in accordance with local/regional/national/international regulations.

### Residual waste
Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

### Contaminated packaging
Since emptied containers may retain product residue, follow label warnings even after container is emptied.
