1. Identification

Product identifier: Poulvac i IBD
Other means of identification:
  Synonyms: BURSINE-K * Infectious bursal disease vaccine, killed virus

Recommended use of the chemical and restrictions on use:
  Recommended use: Veterinary vaccine
  Restrictions on use: Not for human use

Details of manufacturer or importer:
  Company Name (AU): Zoetis Australia Pty Ltd
  ABN 94 156 476 425
  Level 6, 5 Rider Boulevard
  Rhodes NSW 2138 AUSTRALIA
  Tel: 1800 814 883
  Fax: (02) 8876 0444
  Email: australia.animalhealth@zoetis.com
  Emergency Phone: 1800 814 883 (all hours)
  Police and Fire Brigade: Dial 000
  If ineffective: Dial Poisons Information Centre (13 1126 from anywhere in Australia)

2. Hazard(s) identification

Classification of the hazardous chemical:
  Physical hazards: Not classified.
  Health hazards: Not classified.
  Environmental hazards: Not classified.

Label elements, including precautionary statements:
  Hazard symbol(s): None.
  Signal word: None.
  Hazard statement(s): The mixture does not meet the criteria for classification.
  Precautionary statement(s):
    Prevention: Observe good industrial hygiene practices.
    Response: Wash hands after handling.
    Storage: Store away from incompatible materials.
    Disposal: Dispose of waste and residues in accordance with local authority requirements.

Other hazards which do not result in classification: None known.

Supplemental information: Direct contact with eyes may cause temporary irritation. In the event of accidental injection, an allergic reaction may occur. This product is an oil-adjuvanted suspension. Oil-adjuvant containing products may cause severe vasospasm following accidental injection.

4. First-aid measures

Description of necessary first aid measures

**Inhalation**
Move to fresh air. Call a physician if symptoms develop or persist.

**Skin contact**
Wash off with soap and water. If skin irritation or rash occurs: Get medical advice/attention. Self
Injection: In all instances of accidental self injection contact a doctor as soon as possible. Further
information on treatment is available from Poisons Information Centre - Phone 131 126. Accidental
self injection may lead to an inflammatory response. Medical advice should be sought on the
management of deep injections, particularly those near a joint or associated with bruising. Check
your tetanus immunisation status. Take care to avoid accidental self-injection as this product
contains mineral oil and is an irritant. It can cause pain and prolonged swelling (6-24 months) at
the injection site and in the draining lymph nodes.

**Eye contact**
Rinse thoroughly with plenty of water for at least 15 minutes and consult a physician. Remove
contact lenses, if present and easy to do.

**Ingestion**
Rinse mouth. Call a physician or poison control centre immediately. Only induce vomiting at the
instruction of medical personnel. Never give anything by mouth to an unconscious person.

**Personal protection for first-aid
responders**
IF exposed or concerned: Get medical advice/attention. Ensure that medical personnel are aware
of the material(s) involved, and take precautions to protect themselves. You should call The
Poisons Information Centre if you feel that you may have been poisoned, burned or irritated by this
product. The number is 13 1126 from anywhere in Australia (0800 764 766 in New Zealand) and is
available at all times. Have this SDS with you when you call. For personal protection, see section 8
of the SDS.

**Symptoms caused by exposure**
Direct contact with eyes may cause temporary irritation. Exposed individuals may experience eye
tearing, redness, and discomfort. In the event of accidental injection, an allergic reaction may
occur. Signs and symptoms might include skin rash, itching, redness or swelling. Respiratory
reactions may be characterized by rhinitis, sneezing, scratchy throat, oral mucosal edema,
laryngeal mucosal edema, coughing, shortness of breath, wheezing, and chest pain. Asthma like
reactions occur with acute exposures in sensitized patients. This product is an oil-adjuvanted
suspension. Oil-adjuvant containing products may cause severe vasospasm following accidental
injection.

**Medical attention and special
treatment**
This product contains mineral oil. In the event of accidental self-administration, it can cause
significant pain and prolonged swelling for 6 to 24 months at the injection site, perhaps also
involving the draining lymph nodes. Medical or surgical intervention may be required, especially if
the site of injection involves a finger joint or tendon sheath. Accidental self-injection of this vaccine
may result in cross- reaction with, and a false positive test results for human tuberculosis. Cases
of accidental self-injection should also be reported to Zoetis on 1800 814 883.

5. Fire-fighting measures

**Extinguishing media**
Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

**Suitable extinguishing
media**
Do not use water jet as an extinguisher, as this will spread the fire.

**Unsuitable extinguishing
media**
During fire, gases hazardous to health may be formed. Material will burn in a fire.

**Specific hazards arising from
the chemical**
Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

**Special protective equipment
and precautions for fire
fighters**
Move containers from fire area if you can do so without risk.

**Fire fighting equipment/instructions**
None.

**General fire hazards**
No unusual fire or explosion hazards noted. Mineral oil is combustible.

**Hazchem code**
Use standard firefighting procedures and consider the hazards of other involved materials.

6. Accidental release measures

**Personal precautions, protective equipment and emergency procedures**

**For non-emergency
personnel**
Keep unnecessary personnel away.

**For emergency responders**
Keep unnecessary personnel away. Wear appropriate protective equipment and clothing during
clean-up. Do not breathe mist or vapour. Avoid contact with eyes, skin, and clothing.

**Environmental precautions**
Avoid discharge into drains, water courses or onto the ground.
Methods and materials for containment and cleaning up

Remove sources of ignition.

Large Spills: Stop the flow of material, if this is without risk. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use.

7. Handling and storage

Precautions for safe handling

Avoid contact with eyes, skin, and clothing. Avoid breathing mist or vapour. Avoid accidental injection. Wash thoroughly after handling. When using, do not eat, drink or smoke. Wear personal protective equipment. Avoid release to the environment. Observe good industrial hygiene practices.

Conditions for safe storage, including any incompatibilities

Store in a cool, dry place out of direct sunlight. Store at 2 - 8°C (36 - 46°F). Do not freeze. Protect from light. Keep away from heat, sparks and open flame. Store in original tightly closed container. Use care in handling/storage. Store away from incompatible materials (see Section 10 of the SDS). Keep out of the reach of children.

8. Exposure controls and personal protection

Control parameters

Follow standard monitoring procedures.

Biological limit values

No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls

General ventilation normally adequate.

Individual protection measures, for example personal protective equipment (PPE)

Eye/face protection

If contact is likely, safety glasses with side shields are recommended.

Skin protection

Hand protection

Wear protective gloves.

Other

Wear suitable protective clothing. Use protective clothing (uniforms, lab coats, disposable coveralls, etc.) in both production and laboratory areas.

Respiratory protection

No personal respiratory protective equipment normally required. In case of insufficient ventilation, wear suitable respiratory equipment.

Thermal hazards

Not applicable.

Hygiene measures

Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
9. Physical and chemical properties

Appearance
- Physical state: Liquid.
- Form: Liquid.
- Colour: White to light tan liquid.

Odour
- Not available.

Odour threshold
- Not available.

pH
- Not available.

Melting point/freezing point
- Not available.

Initial boiling point and boiling range
- > 200 °C (> 392 °F) estimated

Flash point
- > 100.0 °C (> 212.0 °F) estimated

Evaporation rate
- Not available.

Flammability (solid, gas)
- Not applicable.

Upper/lower flammability or explosive limits
- Flammability limit - lower (%): Not available.
- Flammability limit - upper (%): Not available.
- Explosive limit - lower (%): Not available.
- Explosive limit – upper (%): Not available.

Vapour pressure
- Not available.

Vapour density
- Not available.

Relative density
- Not available.

Solubility(ies)
- Solubility (water): Not available.

Partition coefficient (n-octanol/water)
- Not available.

Auto-ignition temperature
- Not available.

Decomposition temperature
- Not available.

Viscosity
- Not available.

Other physical and chemical parameters
- Explosive properties: Not explosive.
- Oxidising properties: Not oxidising.

10. Stability and reactivity

Reactivity
- The product is stable and non-reactive under normal conditions of use, storage and transport.

Chemical stability
- Material is stable under normal conditions.

Possibility of hazardous reactions
- No dangerous reaction known under conditions of normal use.

Conditions to avoid

Incompatible materials
- Strong oxidising agents.

Hazardous decomposition products
- No hazardous decomposition products are known.

11. Toxicological information

Information on possible routes of exposure
- Inhalation: No adverse effects due to inhalation are expected.
- Skin contact: No adverse effects due to skin contact are expected. Prolonged skin contact may cause temporary irritation.
<table>
<thead>
<tr>
<th>Skin contact</th>

Ingestion

Health injuries are not known or expected under normal use.

Symptoms related to exposure

Direct contact with eyes may cause temporary irritation. Exposed individuals may experience eye tearing, redness, and discomfort. In the event of accidental injection, an allergic reaction may occur. Signs and symptoms might include skin rash, itching, redness or swelling. Respiratory reactions may be characterized by rhinitis, sneezing, scratchy throat, oral mucosal edema, laryngeal mucosal edema, coughing, shortness of breath, wheezing, and chest pain. Asthma like reactions occur with acute exposures in sensitized patients. This product is an oil-adjuvanted suspension. Oil-adjuvant containing products may cause severe vasospasm following accidental injection.

Acute toxicity

Expected to be a low hazard for usual industrial or commercial handling by trained personnel.

Respiratory or skin sensitisation

Respiratory sensitisation

Not classified. In the event of accidental injection, an allergic reaction may occur.

Skin sensitisation

Not classified. In the event of accidental injection, an allergic reaction may occur.

Germ cell mutagenicity

No data available to indicate product or any components present at greater than 0.1% are mutagenic or genotoxic.

Carcinogenicity

Due to partial or complete lack of data the classification is not possible.

<table>
<thead>
<tr>
<th>ACGIH Carcinogens</th>
<th>IARC Monographs. Overall Evaluation of Carcinogenicity</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mineral oil, white (CAS 8042-47-5)</td>

<tr>
<td>Mineral oil, white (CAS 8042-47-5)</td>
<td>3 Not classifiable as to carcinogenicity to humans.</td>
</tr>
</tbody>
</table>

Reproductive toxicity

This product is not expected to cause reproductive or developmental effects.

Specific target organ toxicity - single exposure

Not classified.

Specific target organ toxicity - repeated exposure

Not classified.

Aspiration hazard

Not an aspiration hazard.

Other information

The antigens included in this product are non-infectious. All have been prepared from killed or inactivated preparations of microorganisms.

12. Ecological information

Ecotoxicity

The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment. Avoid release to the environment.
Persistence and degradability
No data is available on the degradability of this product.

Bioaccumulative potential
No data available.

Mobility in soil
No data available for this product.

Other adverse effects
No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal methods
Avoid release to the environment. This material and its container must be disposed of in a safe way. Do not discharge into drains, water courses or onto the ground. Considering the relevant known environmental and human health hazards of the material, review and implement appropriate technical and procedural waste water and waste disposal measures to prevent occupational exposure and environmental release. It is recommended that waste minimization be practiced. The best available technology should be utilized to prevent environmental releases. This may include destructive techniques for waste and wastewater. Dispose of contents/container in accordance with local/regional/national/international regulations.

Residual waste
Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging
Since emptied containers may retain product residue, follow label warnings even after container is emptied.

14. Transport information

ADG
Not regulated as dangerous goods.

RID
Not regulated as dangerous goods.

IATA
Not regulated as dangerous goods.

IMDG
Not regulated as dangerous goods.

Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code
Not established.

15. Regulatory information

Safety, health and environmental regulations

National regulations
This Safety Data Sheet was prepared in accordance with the Australia Model Code of Practice for the preparation of safety data sheets for hazardous chemicals.

### 16. Other information

**Issue date**: 02-July-2018  
**Revision date**: 04-October-2018  
**Disclaimer**: Zoetis Inc. believes that the information contained in this Safety Data Sheet is accurate, and while it is provided in good faith, it is without warranty of any kind, expressed or implied. If data for a hazard are not included in this document there is no known information at this time. The information in the sheet was written based on the best knowledge and experience currently available.  
**Revision information**: This document has undergone significant changes and should be reviewed in its entirety.
