

## Section 1 - Identification of the Substance/Mixture and Supplier

### Zoetis Australia Pty Ltd

ABN 94 156 476 425

Level 6, 5 Rider Blvd

Rhodes NSW 2138 AUSTRALIA

Tel: 1800 814 883

Fax: (02) 8876 0444

Email: australia.animalhealth@zoetis.com

<b>Product Identifier:</b>	<b>Scabigard® Vaccine</b>
<b>Other names:</b>	None.
<b>APVMA Approval No:</b>	53559
<b>Chemical family:</b>	Contagious pustular dermatitis virus, living, cell culture in a suitable medium. The virus has been grown in a continuous ovine cell line and both the virus and cell line have been fully tested for adventitious agents. The cell line has been tested for oncogenicity. Both virus and cell line are used on approved seed lot principles.
<b>Recommended Use:</b>	For the immunisation of lambs and sheep against "Scabby Mouth" -also known as "Contagious Pustular Dermatitis", "Contagious Ecthyma" and "Orf".
<b>Restrictions on use</b>	For veterinary use only.
<b>Emergency Phone:</b>	<b>1800 814 883 (all hours)</b>

## Section 2 - Hazards Identification

### Statement of Hazardous Nature

This product is classified as: Not classified as hazardous according to the criteria of SWA.

Not a Dangerous Good according to Australian Dangerous Goods (ADG) Code, IATA or IMDG/IMSBC criteria.

**Risk Phrases:** Not Hazardous - No criteria found.

**Safety Phrases:** S23, S25, S36. Do not breathe mists. Avoid contact with eyes. Wear suitable protective clothing.

**ADG Classification:** None allocated. Not a Dangerous Good according to Australian Dangerous Goods (ADG) Code, IATA or IMDG/IMSBC criteria.

**GHS Label Elements:** None

**Signal word:** None – Not hazardous.

**GHS Classification:** Not hazardous.

### PREVENTION

P102: Keep out of reach of children.

P262: Do not get in eyes, on skin, or on clothing.

P281: Use personal protective equipment as required.

### RESPONSE

P353: Rinse skin or shower with water.

P301+P330+P331: IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.

P370+P378: Not combustible. Use extinguishing media suited to burning materials.

### STORAGE

P410: Protect from sunlight.

P411: Store at temperatures preferably between 2 and 8°C, but do not freeze.

P403+P233: Store in a well-ventilated place. Keep container tightly closed.

### DISPOSAL

P501: Dispose of small quantities and empty containers by wrapping with paper and putting in garbage. For larger quantities, if recycling or reclaiming is not possible, use a commercial waste disposal service.

**Other/supplementary hazards.** None known.

## Emergency Overview

**Physical Description & colour:** Blue aqueous suspension.

**Odour:** No data re odour.

**Major Health Hazards:** Scabby mouth disease is caused by a virus which is communicable to man. The vaccine is capable of causing a skin infection in persons using it, and although it is not usually serious, such an infection may be annoying.

No specific medical attention is advised. Treat symptomatically.

## SAFETY DATA SHEET

Issued by: Zoetis Australia Pty Ltd

Phone: 1800 814 883

Poisons Information Centre: 13 1126 from anywhere in Australia

## Section 3 - Composition/Information on Ingredients

Ingredients	CAS No	Conc,%	TWA (mg/m <sup>3</sup> )	STEL (mg/m <sup>3</sup> )
Saline suspension *	not set	100%	not set	not set

\* Containing:

Contagious pustular dermatitis virus, living, cell culture and other minor ingredients.

This is a commercial product whose exact ratio of components may vary slightly. Minor quantities of other non hazardous ingredients are also possible.

The SWA TWA exposure value is the average airborne concentration of a particular substance when calculated over a normal 8 hour working day for a 5 day working week. The STEL (Short Term Exposure Limit) is an exposure value that may be equalled (but should not be exceeded) for no longer than 15 minutes and should not be repeated more than 4 times per day. There should be at least 60 minutes between successive exposures at the STEL. The term "peak" is used when the TWA limit, because of the rapid action of the substance, should never be exceeded, even briefly.

## Section 4 - First Aid Measures

### General Information:

You should call The Poisons Information Centre if you feel that you may have been poisoned, burned or irritated by this product. The number is 13 1126 from anywhere in Australia and is available at all times. Have this SDS with you when you call.

**Self Injection:** Accidental self injection may lead to an inflammatory response. Medical advice should be sought on the management of deep injections, particularly those near a joint or associated with bruising. If possible the application of gentle squeezing pressure with absorbent material (e.g. facial tissues) at the injection site will swab up unabsorbed vaccine. Strong squeezing of the site should be avoided. The damaged area should be thoroughly cleansed and a topical antiseptic applied. Check your tetanus immunisation status.

**Inhalation:** First aid is not generally required. If in doubt, contact a Poisons Information Centre or a doctor.

**Skin Contact:** Irritation is unlikely. However, if irritation does occur, flush with lukewarm, gently flowing water for 5 minutes or until chemical is removed.

**Eye Contact:** No effects expected. If irritation does occur, flush contaminated eye(s) with lukewarm, gently flowing water for 5 minutes or until the product is removed. Obtain medical advice if irritation becomes painful or lasts more than a few minutes. Take special care if exposed person is wearing contact lenses.

**Ingestion:** If product is swallowed or gets in mouth, do NOT induce vomiting; wash mouth with water and give some water to drink. If symptoms develop, or if in doubt contact a Poisons Information Centre or a doctor.

### Most Important Symptoms and Effects, Both Acute and Delayed

**Symptoms and Effects of Exposure:** None known.

**Medical Conditions Aggravated by Exposure:** None known.

**Indication of the Immediate Medical Attention and Special Treatment Needed:** None known.

**Notes to Physician:** None.

## Section 5 - Fire Fighting Measures

**Hazards arising from the product:** The major hazard in fires is usually inhalation of heated and toxic or oxygen deficient (or both), fire gases. There is no risk of an explosion from this product under normal circumstances if it is involved in a fire.

Only small quantities of decomposition products are expected from this product at temperatures normally achieved in a fire. This will only occur after heating to dryness.

Fire decomposition products from this product are not expected to be hazardous or harmful.

**Suitable Extinguishing Media:** Not combustible. Use extinguishing media suited to burning materials.

**Special Protective Equipment and Precautions for Firefighters:** If a significant quantity of this product is involved in a fire, call the fire brigade.

**Hazchem Code:** None

## Section 6 - Accidental Release Measures

**Personal precautions, protective equipment and emergency procedures:** This product is sold in small packages, and the accidental release from one of these is not usually a cause for concern. For minor spills, refer to product label for specific instructions. No special protective clothing is normally necessary because of this product. However it is good practice to wear latex gloves when handling injectables. In the event of a major spill, prevent spillage from entering drains or water courses and call emergency services.

**Environmental Precautions:** None.

## SAFETY DATA SHEET

**Methods and Material for Containment and Cleaning Up.** This product is sold in small packages. No special measures are usually necessary following spills.

**Measures for Cleaning / Collecting:** Contain the source of the spill if it is safe to do so. Absorb spills with non-combustible absorbent material and transfer into a labelled container for disposal.

**Additional Consideration for Large Spills:** Non-essential personnel should be evacuated from affected area. Report emergency situations immediately. Clean up operations should only be undertaken by trained personnel.

## Section 7 - Handling and Storage

**Handling:** Keep exposure to this product to a minimum, and minimise the quantities kept in work areas. Check Section 8 of this SDS for details of personal protective measures, and make sure that those measures are followed. The measures detailed below under "Storage" should be followed during handling in order to minimise risks to persons using the product in the workplace. Also, avoid contact or contamination of product with incompatible materials listed in Section 10.

Scabby mouth disease is caused by a virus which is communicable to man. The vaccine is capable of causing a skin infection in persons using it, and although it is not usually serious, such an infection may be annoying. Therefore, every precaution must be taken to prevent the vaccine coming into contact with the eyes or abrasions on the operator's skin, and special care must also be taken not to scratch the fingers with the vaccine applicator used to vaccinate the animals. Immune suppressed individuals should exercise special care when administering or handling this vaccine. Wear gloves when dismantling the Scabigard® Applicator for routine sterilisation. It is important not to use a scrubbing brush as this may cause cuts or abrasions to the skin and possible self-inoculation.

**Storage:** Refrigerate, preferably between 2 and 8°C, but do not freeze. Store in the closed original container in a dry, cool, well-ventilated area out of direct sunlight. Make sure that the product does not come into contact with substances listed under "Incompatibilities" in Section 10. Some liquid preparations settle or separate on standing and may require stirring before use. Check packaging - there may be further storage instructions on the label. Protect containers against physical damage and check regularly for leaks.

Discard any vaccine not used on the day of vaccination as bacteria and/or fungi may contaminate the vaccine during use, multiply during storage, and cause unwanted infections and/or reduce vaccine efficacy.

## Section 8 - Exposure Controls and Personal Protection

### Control Parameters:

The following Australian Standards will provide general advice regarding safety clothing and equipment:

Respiratory equipment: **AS/NZS 1715**, Protective Gloves: **AS 2161**, Occupational Protective Clothing: **AS/NZS 4501 set 2008**, Industrial Eye Protection: **AS1336** and **AS/NZS 1337**, Occupational Protective Footwear: **AS/NZS2210**.

<b>SWA Exposure Limits</b>	<b>TWA (mg/m<sup>3</sup>)</b>	<b>STEL (mg/m<sup>3</sup>)</b>
----------------------------	-------------------------------	--------------------------------

Exposure limits have not been established by SWA for this product.

**Engineering Controls:** No special equipment is usually needed when occasionally handling small quantities. The following instructions are for bulk handling or where regular exposure in an occupational setting occurs without proper containment systems.

No special ventilation requirements are normally necessary for this product. However make sure that the work environment remains clean and that vapours and mists are minimised.

**Eye Protection:** Eye protection is not normally necessary when this product is being used. However, if in doubt, wear suitable protective glasses or goggles.

**Skin Protection:** The information at hand indicates that this product is not harmful and that normally no special skin protection is necessary. However, we suggest that you routinely avoid contact with all chemical products and that you wear suitable gloves (preferably elbow-length) when skin contact is likely.

**Protective Material Types:** There is no specific recommendation for any particular protective material type.

**Respirator:** Not required for the normal use of this product. If the applicable Occupational Exposure Limit (OEL) is exceeded, wear an appropriate respirator with a protection factor sufficient to control exposures to below the OEL.

Safety deluge showers should, if practical, be provided near to where this product is being handled commercially.

## Section 9 - Physical and Chemical Properties:

<b>Appearance:</b>	Blue aqueous suspension.
<b>Odour:</b>	No data re odour.
<b>Odour Threshold:</b>	No data.
<b>pH:</b>	No data.
<b>Freezing/Melting Point:</b>	Approximately 0°C.

### SAFETY DATA SHEET

<b>Boiling Point:</b>	Approximately 100°C at 100kPa.
<b>Flash point:</b>	Does not burn.
<b>Upper Flammability Limit:</b>	Does not burn.
<b>Lower Flammability Limit:</b>	Does not burn.
<b>Autoignition temperature:</b>	Not applicable - does not burn.
<b>Flammability Class:</b>	Does not burn.
<b>Upper Flammability Limit:</b>	Does not burn.
<b>Lower Flammability Limit:</b>	Does not burn.
<b>Autoignition temperature:</b>	Not applicable - does not burn.
<b>Flammability (solid, gas):</b>	Not applicable.
<b>Flammability Class:</b>	Does not burn.
<b>Decomposition Temperature:</b>	No data.
<b>Volatiles:</b>	Water component.
<b>Vapour Pressure:</b>	2.37 kPa at 20°C (water vapour pressure).
<b>Vapour Density:</b>	As for water.
<b>Relative Density:</b>	1.0 approx.
<b>Water Solubility:</b>	Completely soluble in water.
<b>Solvent Solubility:</b>	No data.
<b>Volatility:</b>	No data.
<b>Evaporation Rate:</b>	As for water.
<b>Partition Coefficient (n-octanol/water):</b>	No data
<b>Autoignition temp:</b>	Not applicable - does not burn.
<b>Viscosity:</b>	Not applicable.

---

## Section 10 - Stability and Reactivity

**Reactivity:** This product is unlikely to react or decompose under normal storage conditions. However, if you have any doubts, contact the supplier for advice on shelf life properties.

**Stability:** Stable if stored under normal conditions.

**Conditions to Avoid:** Refrigerate, preferably between 2 and 8°C, but do not freeze. Protect this product from light. Store in the closed original container in a dry, cool, well-ventilated area out of direct sunlight.

**Incompatibilities:** No particular Incompatibilities.

**Hazardous decomposition products:** No specific data. Based on composition of bacteria and viruses, the following might be expected in small quantities: Carbon dioxide, and if combustion is incomplete, carbon monoxide and possibly smoke. Nitrogen and its compounds, and under some circumstances, oxides of nitrogen. Oxides of sulfur (sulfur dioxide is a respiratory hazard) and other sulfur compounds; also water. Also very small quantities of mercury and aluminium compounds.

**Polymerisation:** This product will not undergo polymerisation reactions.

---

## Section 11 - Toxicological Information

### Symptoms caused by Exposure

**General Information:** Scabby mouth disease is caused by a virus which is communicable to man. The vaccine is capable of causing a skin infection in persons using it, and although it is not usually serious, such an infection may be annoying.

**Routes of exposure:** No data.

**Symptoms of exposure:** No data.

**Inhalation:**

**Short term exposure:** Available data indicates that this product is not harmful. In addition product is unlikely to cause any discomfort or irritation.

**Long Term exposure:** No data for health effects associated with long term inhalation.

## SAFETY DATA SHEET

**Skin Contact:**

**Short term exposure:** Available data indicates that this product is not harmful. It should present no hazards in normal use. In addition product is unlikely to cause any discomfort in normal use.

**Long Term exposure:** No data for health effects associated with long term skin exposure.

**Eye Contact:**

**Short term exposure:** This product may be mildly irritating to eyes, but is unlikely to cause anything more than mild discomfort which should disappear once product is removed.

**Long Term exposure:** No data for health effects associated with long term eye exposure.

**Ingestion:**

**Short term exposure:** Significant oral exposure is considered to be unlikely. However, this product may be mildly irritating to mucous membranes but is unlikely to cause anything more than mild transient discomfort.

**Long Term exposure:** No data for health effects associated with long term ingestion.

**Specific Target Organ Toxicity (STOT) – single exposure:** No data.

**Specific Target Organ Toxicity (STOT) – repeated exposure:** No data.

**Aspiration Hazard:** No data.

**Early Onset Symptoms Related to Exposure:** No data.

**Delayed Health Effects from Exposure:** No data.

**Exposure Levels and Health Effects:** No data.

**Interactive Effects:** No data.

### Classification of Hazardous Ingredients

Ingredient

Risk Phrases

No ingredient mentioned in the HSIS Database is present in this product at hazardous concentrations.

**There is no data to hand indicating any particular target organs.**

**Respiratory or Skin Sensitisation:** No data.

**Germ Cell Mutagenicity:** No data.

**Carcinogenicity:** No data.

**Reproductive Toxicity:** No data.

**Carcinogen Status:**

**SWA:** No significant ingredient is classified as carcinogenic by SWA.

**NTP:** No significant ingredient is classified as carcinogenic by NTP.

**IARC:** No significant ingredient is classified as carcinogenic by IARC.

## Section 12 - Ecological Information

Insufficient data to be sure of status. Expected to not be an environmental hazard.

**Toxicity information:** No data.

**Persistence and degradability:** No data.

**Bioaccumulative potential:** No data.

**Mobility in soil:** No data.

**Other adverse effects:** No data.

## Section 13 - Disposal Considerations

**Disposal:** Dispose of the Scabigard® vaccine bottle by placing into a designated and appropriately labelled 'sharps' container. At the end of each vaccination session, sterilise used cotton-wool and cloths that have been in contact with the vaccine before discarding. Sterilisation may be effected either by boiling in water for 10 minutes or by completely submerging the materials in a freshly prepared disinfectant solution for at least 30 minutes. Suitable disinfectants include hypochlorite (5% solution), lysol (20 ml to 1 litre of water) and iodophor preparations. Quaternary ammonium disinfectants are also satisfactory but should preferably be diluted using alcohol or methylated spirits. Prepare solutions according to label instructions for instrument sterilisation. Leave all contaminated material immersed in the solution for at least 30 minutes.

### SAFETY DATA SHEET

## Section 14 - Transport Information

**UN Number:** This product is not classified as a Dangerous Good by ADG, IATA or IMDG/IMSBC criteria. No special transport conditions are necessary unless required by other regulations.

**Special precaution for user:** None known.

**Additional Information:** None known.

**Environmental Hazard:** None known.

## Section 15 - Regulatory Information

**Poison Schedule:** None allocated

**AICS:** All of the significant ingredients in this formulation are compliant with NICNAS regulations.

## Section 16 - Other Information

**This SDS contains only safety-related information. For other data see product literature.**

**Data Sources:** The data contained in this SDS may have been gathered from confidential internal sources, raw material suppliers, or from the published literature.

### Acronyms:

<b>ADG Code</b>	Australian Code for the Transport of Dangerous Goods by Road and Rail (7 <sup>th</sup> edition)
