

Peter Colliver

STONEY POINT PERFORMANCE ANGUS, NORTH ADELAIDE, SA

Peter Colliver is the Stud Manager of Stoney Point Performance Angus for the past 6 years, with over 20 years of farming experience both here in Australia and abroad in both the stud stock industry and in the broader commercial sector.

"At the peak of our production Stoney Point Performance Angus was running 630 registered breeders and selling over 200 bulls annually to seedstock and commercial producers".

"As part of our herd quality assurance program, vaccinating with Pestigard to protect our herd and that of our clients' herds is of paramount importance".

"Vaccinating with Pestigard gives me peace of mind that our valuable stud herd is protected from the devastating effects of pestivirus, given the proximity of our neighbours that trade cattle and run an extensive feedlot".

"I have seen first-hand the devastating effect that Bovine Viral Diarrhea Virus (Pestivirus) can unleash in a herd and the crippling social and financial effect that it had on the herd owners".

"In the 6 years I have been managing the Stoney Point stud we have sent off thousands of PI tests as part of our bull health guarantee and all have come back negative, this I feel is a true testament to the effectiveness of the Pestigard vaccine".

"I wouldn't work anywhere that doesn't use Pestigard, as it is an integral tool in maintaining a healthy and productive herd".

"I wouldn't work anywhere that doesn't use Pestigard, as it is an integral tool in maintaining a healthy and productive herd".

"Vaccinating with Pestigard to protect our herd and that of our clients' herds is of paramount importance".
